Description

Beginning in the 2023-2024 academic year, the M.S. Human Development and Family Studies (Child/Adolescent Development) is pausing admissions to the program. Current students will continue to have access to the same high-quality education and resources until they graduate.

M.S. Degree: Core Areas of Study

The Core Areas of Study has two foci: Child Development and Adolescent Development. Students in the Core Areas of Study Program may elect one of two options to complete their master's degree: Thesis or Comprehensive Examination. Both programs prepare students to work in a variety of human service positions and enter doctoral programs. Please visit the [Career Opportunities](#) section of our website for more information.

Child Development: This core area of study is designed to develop an understanding of theory and research regarding children from infancy through the early school years and to prepare students to work in a variety of positions focused on children's family and school experiences. Students are expected to complete a practicum in a child-focused setting.

Adolescent Development: This core area of study is designed to develop general competence in understanding and applying theory and research regarding adolescence through early adulthood within the context of families and communities. Students are expected to complete a practicum in a program that serves adolescents.
